

ATLAS Electricity Metering Current Transformers

An extensive range of moulded solid and split core, including ring type, current transformers are available to facilitate the metering of high current circuits with ± 5 Amp secondary meters. Prices start at around £11 each for moulded case and £30 for split core models.

All prices exclude VAT and carriage. A separate document confirms physical size availability for each CT ratio and type and individual prices.

To order simply state the CT primary current and your selected CT model.
