

NewFound Energy Electricity Metering Current Transformers

An extensive range of moulded solid and split core current transformers are available to facilitate the metering of high current circuits. Models with -/5 Amp secondary output and 0.33V output are available to match meter selections.

Prices start at around £12 each for moulded case and £30 for split core models.

For meters requiring an mV input different models of mini split core CTs are available.

Please contact us for more information on our range of current transformers.
